

GLASS SCREEN PROTECTORS

Let **CENTRAL GLASS** help you better prepare your business or office by installing beautiful new glass partitions to provide protection to both your clients and staff members. This screen protector system is a safe, high quality barrier clamp system engineered for public spaces, such as retail locations, hotels, restaurants, and office settings.

Unlike acrylic screens, glass is easy to clean and does not scratch easily. Glass does not yellow over time and remains optically clear, ensuring a high level of visibility. The solid base is made from a high quality aluminum in a clear anodized finish. It is stable on countertops and other surfaces and provides excellent protection from bacteria and other microbes.

IDEAL FOR
TEMPORARY AND
LONG TERM USAGE
